

# 2025 Impact

In 2025, Vote Solar continued its impactful advocacy for clean energy nationwide, advocating for equitable access to solar and other clean energy resources.

WE WORKED ON 159 CAMPAIGNS. BECAUSE OF OUR WORK, WE CREATED...

**12,790 MW**  
demand for solar

including **5,519 MW** of local solar and **2,467 MW** dedicated to benefit low-wealth and frontline communities.

That's the equivalent of powering  
**2.8 million households**  
with carbon-free energy

which will lead to **272,432 solar jobs**

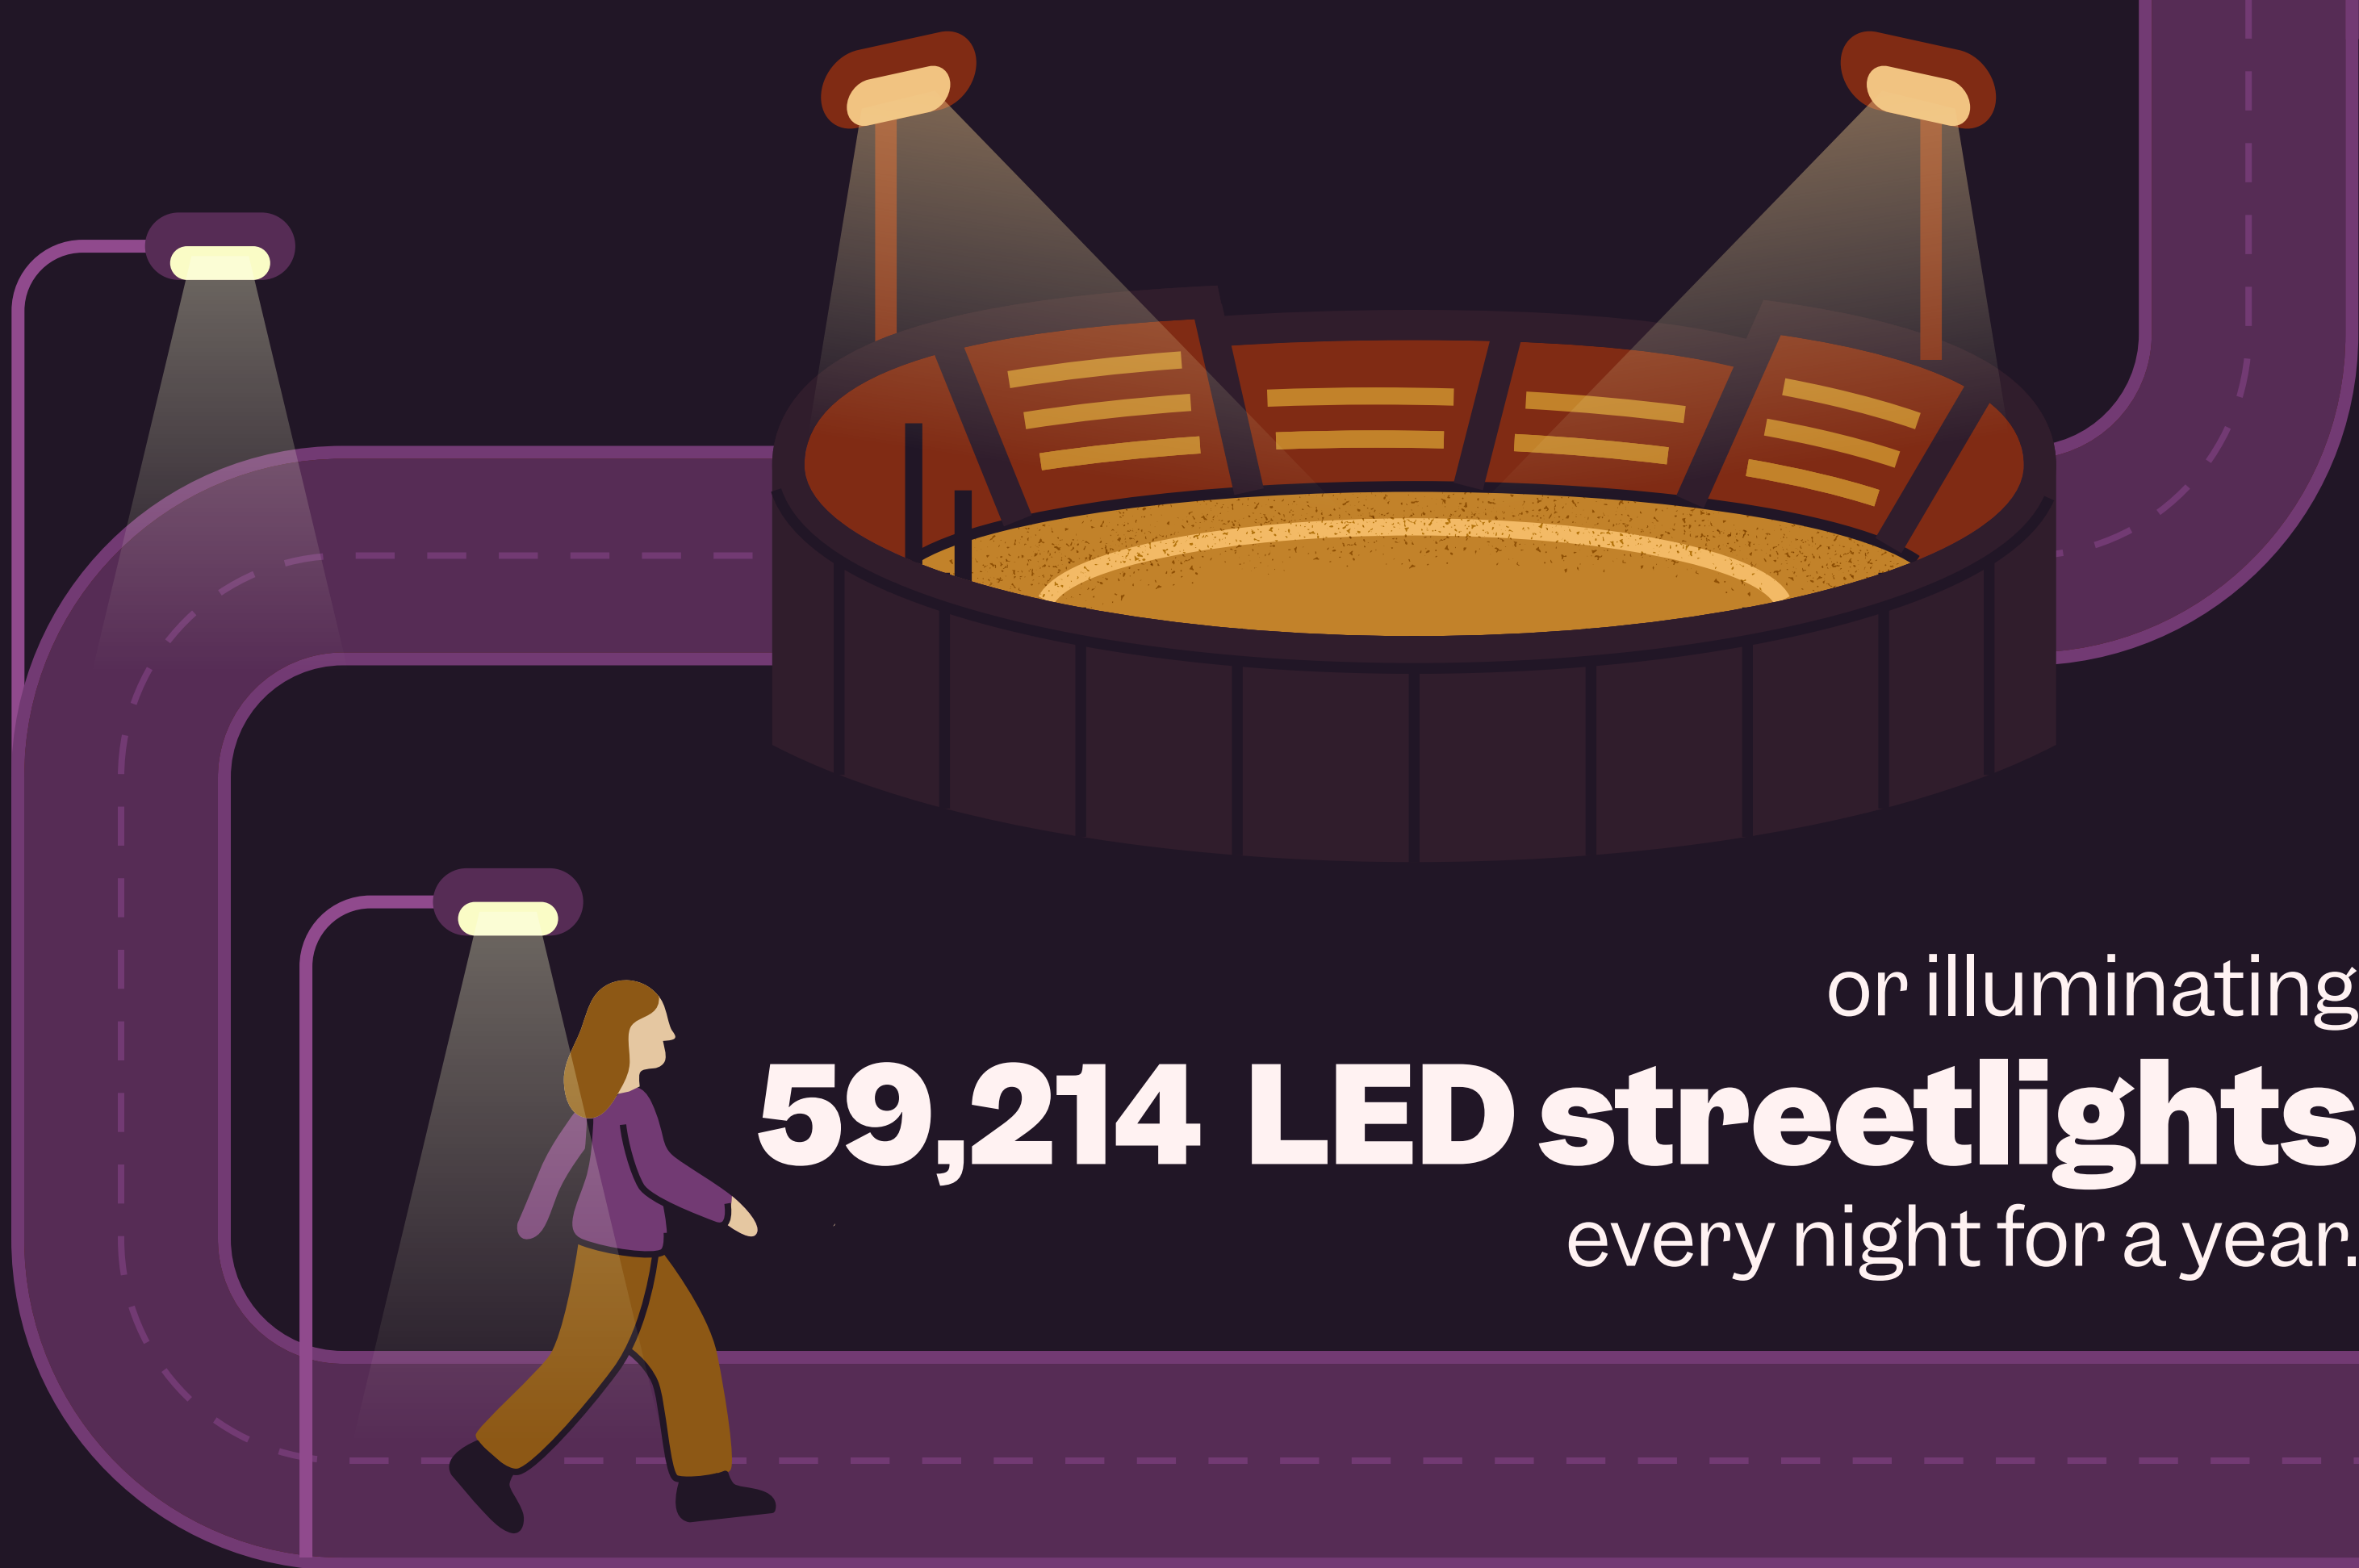

It's also like powering

**57 football stadiums**

with clean energy for a full season

or illuminating  
**59,214 LED streetlights**  
every night for a year.

Together, we avoided  
**7.13 million tons**  
of carbon dioxide

preventing the construction of  
**2 gas plants,**

totalling **800 MW**  
of avoided gas plants.
